DIRECTORY - 2006

IMPORTANT MESSAGES

Whilst every care has been taken to ensure the accuracy of the contents of this Directory, it is important that Certificate Holders and Agents check their respective entries and advise the AGA of any errors and/or omissions. It should be noted that the contact details for individual Certificate Holders and Agents are included under an Index at the back of the Directory.

The Directory is available *free* from the AGA website (www.aga.asn.au) and will be republished periodically throughout the year with appropriate changes included. The online Directory may be printed in full, or in part, if required. Please note that hard copies of the Directory are no longer available for purchase from AGA.

To assist in ensuring the accuracy of AGA records, would you please advise of any alterations or corrections by completing the following form and faxing this page to:

The Manager Administration, Quality & Marketing - Fax: (03) 9580 5500

PLEASE NOTE CONTACT DETAILS:

PREFACE

The Australian Gas Association (AGA) manages and operates accredited Product Certification Schemes, with funding largely provided by Certificate Holders through certification fees and badge sales. The AGA is an active participant in the standards writing process with representation on many *Standards Australia* committees that develop and publish the standards that underpin the Schemes.

In addition to product certification services for the electrical and plumbing industries, the AGA certifies gas product for the following categories or any combination of these categories:

- Natural Gas
- Town Gas
- Tempered Liquefied Petroleum Gas
- Liquefied Petroleum Gas

Approval for Liquefied Petroleum Gas appliances is divided into three sub-groups, designated as P (Propane), B (Butane) or U (Universal) gas.

Product Compliance:

Product that has been certified by AGA to comply with the requirements of the relevant Code/Standard, is subject to the Rules Governing the Scheme and, if required under the Scheme, is subject to routine and regular audits to confirm continued compliance.

IMPORTANT MESSAGES

Whilst every care has been taken to ensure the accuracy of the contents of this Directory, it is important that Certificate Holders and Agents check their respective entries and advise the AGA of any errors and/or omissions. It should be noted that the contact details for individual Certificate Holders and Agents are included under an Index at the back of the Directory.

The Directory is available *free* from the AGA website (www.aga.asn.au) and will be republished periodically throughout the year with appropriate changes included. The online Directory may be printed in full, or in part, if required. Please note that hard copies of the Directory are no longer available for purchase from AGA.

To assist in ensuring the accuracy of AGA records, would you please advise of any alterations or corrections by completing the following form and faxing this page to:

The Manager, Industry & Support Services- Fax: (03) 9580 5500

PLEASE NOTE CONTACT DETAILS:

PREFACE

The Australian Gas Association (AGA) manages and operates accredited Product Certification Schemes, with funding largely provided by Certificate Holders through certification fees and badge sales. The AGA is an active participant in the standards writing process with representation on many *Standards Australia* committees that develop and publish the standards that underpin the Schemes.

In addition to product certification services for the electrical and plumbing industries, the AGA certifies gas product for the following categories or any combination of these categories:

- Natural Gas
- Town Gas
- Tempered Liquefied Petroleum Gas
- Liquefied Petroleum Gas

Approval for Liquefied Petroleum Gas appliances is divided into three sub-groups, designated as P (Propane), B (Butane) or U (Universal) gas.

Product Compliance:

Product that has been certified by AGA to comply with the requirements of the relevant Code/Standard, is subject to the Rules Governing the Scheme and, if required under the Scheme, is subject to routine and regular audits to confirm continued compliance.

Directory Structure:

AGA now certifies a variety of products, which are subject to one or more specific accredited type-tested schemes. This Directory lists current certificates grouped under the following headings:

- Type Tested Gas Products only
- Gas Cylinder Certification
- Test Stations Certification
- Type Tested Gas & Electrical Products (ie where the AGA Certificate covers an appliance assessed to both gas and electrical standards, eg a cooker with an electric oven and gas hotplates)
- Type Tested Electrical Products only (ie prescribed and non-prescribed articles)
- Type Tested Plumbing Products (WaterMark)

* denotes
 1st: '0' = basic model with standard safety shut-off valve for continuous pilot ignition
 '4' = for use with an intermittent ignition system, the design is the same as the basic model with the following exceptions:
 - safety shut-off valve deleted
 - pilot valve assembly is employed
 - first coil assembly functions as dual automatic valves
 - diode pack no. 394821-5 or 394821-25 is employed

Honeywell Limited Continued
HONEYWELL

- first automatic valve controls the pilot gas flow
 '5' = for use with a direct spark ignition system, the design is the same as the basic model with the above exceptions.
 2nd: 'A' = standard adjustable gas pressure regulator
 'C' = step-opening gas pressure regulator
 'H' = same as 'A' except the automatic valve assembly no. 393086 is employed for slow-opening characteristics.
 'J' = same as 'H' except time delay diode pack no. 20217A is employed.
 'K' = same as 'H' except the minimum operating temperature is -40°C instead of -17°C.
 'M' = same as 'A' except the minimum operating temperature is -40°C instead of -17°C.
 'N' = same as 'K' except 2-stage regulator employed.
 'P' = same as 'C' except the power unit no. 394331-2 is employed and the minimum operating temper is -40°C.

Note: The final four digits after the model number have no effect on the safety of the valve but determine finer characteristics and individual customer special requirements. For more information, please contact Honeywell.

Note: A range of actuators is available to suit the above valves:

1. SKPx0.11yBz7 actuator
 2. SKP10.123Bz7 high-low control, with end/auxiliary switch actuator
 3. SKP11.211Az7 continuous operation actuator
 4. SKP11.212Az7 continuous operation with auxiliary/end switch actuator
 5. SKP27.11yCz7 proportioning control actuator
 6. SKPx5... Ez actuator

FUEL LOCK-OFF VALVES (AG 802)

Note: As of January 1998 AGA has withdrawn AG 801, AG 802 and AG 804 and AGA now recognises AS/NZ 1425 as the applicable Standard. Certificates which have been assessed against AS/NZS 1425 are listed accordingly. Those that have yet to be so assessed, remain listed under the obsolete AGA code.

IMPORTANT MESSAGES

Whilst every care has been taken to ensure the accuracy of the contents of this Directory, it is important that Certificate Holders and Agents check their respective entries and advise the AGA of any errors and/or omissions. It should be noted that the contact details for individual Certificate Holders and Agents are included under an Index at the back of the Directory.

The Directory is available *free* from the AGA website (www.aga.asn.au) and will be republished periodically throughout the year with appropriate changes included. The online Directory may be printed in full, or in part, if required. Please note that hard copies of the Directory are no longer available for purchase from AGA.

To assist in ensuring the accuracy of AGA records, would you please advise of any alterations or corrections by completing the following form and faxing this page to:

The Manager, Industry & Support Services- Fax: (03) 9580 5500

PLEASE NOTE CONTACT DETAILS:

PREFACE

The Australian Gas Association (AGA) manages and operates accredited Product Certification Schemes, with funding largely provided by Certificate Holders through certification fees and badge sales. The AGA is an active participant in the standards writing process with representation on many *Standards Australia* committees that develop and publish the standards that underpin the Schemes.

In addition to product certification services for the electrical and plumbing industries, the AGA certifies gas product for the following categories or any combination of these categories:

- Natural Gas
- Town Gas
- Tempered Liquefied Petroleum Gas
- Liquefied Petroleum Gas

Approval for Liquefied Petroleum Gas appliances is divided into three sub-groups, designated as P (Propane), B (Butane) or U (Universal) gas.

Product Compliance:

Product that has been certified by AGA to comply with the requirements of the relevant Code/Standard, is subject to the Rules Governing the Scheme and, if required under the Scheme, is subject to routine and regular audits to confirm continued compliance.

Directory Structure:

AGA now certifies a variety of products, which are subject to one or more specific accredited type-tested schemes. This Directory lists current certificates grouped under the following headings:

- Type Tested Gas Products only
- Gas Cylinder Certification
- Test Stations Certification
- Type Tested Gas & Electrical Products (ie where the AGA Certificate covers an appliance assessed to both gas and electrical standards, eg a cooker with an electric oven and gas hotplates)
- Type Tested Electrical Products only (ie prescribed and non-prescribed articles)
- Type Tested Plumbing Products (WaterMark)

 1st: ‘0’ = basic model with standard safety shut-off valve for continuous pilot ignition
 ‘4’ = for use with an intermittent ignition system, the design is the same as the basic model with the following exceptions:
 - safety shut-off valve deleted
 - pilot valve assembly is employed
 - first coil assembly functions as dual automatic valves
 - diode pack no. 394821-5 or 394821-25 is employed
 - first automatic valve controls the pilot gas flow
 ‘5’ = for use with a direct spark ignition system, the design is the same as the basic model with the above exceptions.
 2nd: ‘A’ = standard adjustable gas pressure regulator
 ‘C’ = step-opening gas pressure regulator
 ‘H’ = same as ‘A’ except the automatic valve assembly no. 393086 is employed for slow-opening characteristics.
 ‘J’ = same as ‘H’ except time delay diode pack no. 20217A is employed.
 ‘K’ = same as ‘H’ except the minimum operating temperature is -40°C instead of -17°C.
 ‘M’ = same as ‘A’ except the minimum operating temperature is -40°C instead of -17°C.
 ‘N’ = same as ‘K’ except 2-stage regulator employed.
 ‘P’ = same as ‘C’ except the power unit no. 394331-2 is employed and the minimum operating temper is -40°C.

Note: The final four digits after the model number have no effect on the safety of the valve but determine finer characteristics and individual customer special requirements. For more information, please contact Honeywell.

Notes:

- 1 - All Classifications require 'Pilot Prove Time' – option/parameter #115 be set to 5 seconds
- 2 - 1st Safety time is password protected programmable – option/parameter #114
- 3 - 1st Safety Time of 10 seconds cannot be used for an interrupted start flame, only an intermittent start flame
- 4 – All controllers conform with classification 1A/1B/2A/2B depending on flame monitoring equipment and '1st Safety Time'
 - Class 1 requires the use of a self-check UV scanner or IR scanner (mode dependent)
 - Class A requires the '1st Safety Time' to be set to 3/5 seconds - option/parameter #114 set to 3/5 seconds
- 5 - If external flame switch is installed classification will depend upon the classification of the external flame switch.

5597 3.99 PF 19" PFX 7 xx Series – Electronic Flame Safeguards and Detectors
For use within the PF 19" Series Process Firing System
The details of PFU 7xx models, features & associated components is as follows:
Burner Control Units PFU
Type Code:
PFU - burner control unit
7 - Series 700
60 - standard version
80 - version for pilot & main
L - air valve control - (refer Note 1)
T - mains voltage 220/240VAC, 50/60Hz, for grounded & ungrounded mains
N - mains voltage 110/120VAC, 50/60Hz, for grounded & ungrounded mains
D - digital input for high temperature operation - (refer Note 1)
U - configured and prepared for UVD1 - (refer Note 1)
K1 - replacement for PFS/PFD - (refer Note 1)
K2 - replacement for PFU 778/798 - (refer Note 1)
PFU760xxxx and PFU780xxx with Ionisation (refer Note 2)
PFU760xxxxU and PFU780xxxU with UVD1 (refer Note 2)
PFU760xxxx and PFU780 with UVS (refer Note 2)
PFU760xxxxK1 and PFU780xxxK2 with Ionisation (refer Note 2)
PFU760xxxxK1 and PFU780xxxK2 with UVS (refer Note 2)
Burner control unit for mounting in 19" module sub-racks, for controlling, igniting and monitoring impulse controlled, modulating or staged-controlled gas burners, for continuous operation with ionisation or UV control UVD1 sensor, for intermittent operation with UVS type sensor. Display the program status, unit parameters and flame signal: manual mode for burner adjustment and for diagnostic purposes; visualisation and adaption to the specific application via the PC programming and diagnostic software BCSoft. Optionally available with air valve control and PROFIBUS DP connection via fieldbus interface module PFA.(refer Note 3)
Associated Components
Model UVD1 UV Cell for continuous operation
Model UVS UV cell for <24hr operation
Model BGT S-9U/1 Sub-rack for PFU760, PFU780
Model PFF 7x4 Flame Detector
Model PFR 704 Relay Module
Model PFP700 Power Supply Module
Model PFA700/710 Profibus DP Interface Module

PREFACE

The Australian Gas Association (AGA) manages and operates accredited Product Certification Schemes, with funding largely provided by Certificate Holders through certification fees and badge sales. The AGA is an active participant in the standards writing process with representation on many *Standards Australia* committees that develop and publish the standards that underpin the Schemes.

In addition to product certification services for the electrical and plumbing industries, the AGA certifies gas product for the following categories or any combination of these categories:

- Natural Gas
- Town Gas
- Tempered Liquefied Petroleum Gas
- Liquefied Petroleum Gas

Approval for Liquefied Petroleum Gas appliances is divided into three sub-groups, designated as P (Propane), B (Butane) or U (Universal) gas.

Product Compliance:

Product that has been certified by AGA to comply with the requirements of the relevant Code/Standard, is subject to the Rules Governing the Scheme and, if required under the Scheme, is subject to routine and regular audits to confirm continued compliance.

Directory Structure:

AGA now certifies a variety of products, which are subject to one or more specific accredited type-tested schemes. This Directory lists current certificates grouped under the following headings:

- Type Tested Gas Products only
- Gas Cylinder Certification
- Test Stations Certification
- Type Tested Gas & Electrical Products (ie where the AGA Certificate covers an appliance assessed to both gas and electrical standards, eg a cooker with an electric oven and gas hotplates)
- Type Tested Electrical Products only (ie prescribed and non-prescribed articles)
